

# Tweedmouth West First School

## Learning in the Outdoors

*Respect Responsibility Resilience*

At Tweedmouth West, learning in the outdoors is an integral part of school life.

The children spend a day every week in our Forest School, where the curriculum is taught in a creative and active way.

Our field is looking very different this year, as we have had lots of new additions to our garden. With the help of Haggerston holiday park, we now have new raised beds, compost bins, and newly planted trees to add to our forest. With running repairs to our fencing, and the pruning of our orchard, our outdoor area is well maintained, and ready to go!

We were very fortunate to receive a generous donation of seeds from Berwick Garden Centre, which have now been planted, and are being well cared for by the hardworking Gardening Club. These children meet every week after school to do the hard work in the garden – planting, and weeding.

This year, we earned our second Learning Outside the Classroom Mark (Silver) award. We are the **only school in Northumberland** to have this accolade, and we are very proud to say that we are truly a school that loves the outdoors!
